

SVI Biobank

*Powering the next
generation of research*

Who We Are & What We Offer

Established in 2015 by St Vincent's Institute of Medical Research (SVI), **SVI Biobank** collects, stores, manages over **50,000+** biospecimens from **1,800+** participants – and growing.

We provide end-to-end biobanking solutions tailored to your research needs:

- Study planning & protocol advice
- Sample collection & processing
- Secure, 24/7 monitored storage
- De-identified data management
- Flexible, disease-agnostic specimen storage

Diverse, High-Quality Collections

Spanning Diabetes, Cancer, Hepatitis, HIV, and HTLV, we support projects from clinical trials to basic research, with a focus on blood products and a growing tissue bank.

Our Difference

One of only two ISO 20387 accredited biobanks in Australia – we deliver world-class quality and trusted support for research worldwide.
